

# ParkOne *exclusive*

ParkOne exclusive is the thinnest and most elegant electronic parking disc to date. The design has a pure style without any surplus details. The front is made of brushed aluminum with engraved symbols and clear 3M glue pads. The rear shell is polished acrylic, mounted with two powerful neo magnets that makes it easy as pie to set the parking disc, even when the disc is fitted on the windscreen. ParkOne exclusive was designed by Needit Denmark ApS and developed in Denmark.

The parking disc must be fitted at the lower right hand corner of the car's windscreen. When mounted and set, it will ensure that you don't have to worry about setting the parking disc. The batteries last for at least two years, and not until the discreet diode starts flashing will they have to be replaced. ParkOne exclusive is strong and endures extreme heat, cold and intense sunlight. ParkOne exclusive was tested to strict standards by the Finnish test institution SGS Fimko and approved by the Danish Trafikstyrelsen with approval number FS17.

With ParkOne exclusive, you and your car will arrive in style - just the way that you deserve.

*Sugg. retail price: 899,- DKK*

## Certificates/classification

### Approval

ParkOne exclusive is approved by Trafikstyrelsen In Denmark with reference to the executive order no. 327, 2003 concerning parking discs; the authorization number of the government agency FS17 is shown on the front of the device.

### CE Marking

With the CE Marking, Needit ApS and Needit Denmark ApS declares that the product fulfills the general safety requirements in the relevant CE Marking directives.

With the CE Marking, the manufacturer of the product guarantees that the product is produced according to the standard European safety, health and environmental standards.

Needit ApS hereby declares that this parking disc is in accordance with (CE) EN 55022 (Radio disturbance characteristics) and (CE) EN 55024 (Standards for Commercial Electronic Products).

### WEEE

Electrical and electronic components (EEE) and materials can be harmful to the health and environment, and must be correctly disposed of.

ParkOne exclusive is not to be disposed of in the general trash, but has to be disposed of individually. The batteries can be returned at any retailer selling batteries, and the actual ParkOne exclusive can be disposed of at your local recycling station or at the retailer where you bought it.
